Community Partnerships to promote Health Equity

70th All-America City Awards & Conference June 21, 2019

The Colorado Health Foundation"

Healthy Places focused on supporting communities' efforts to improve their **Neighborhood and Built Environment** in order to increase opportunities for safe, physical activity...

...we updated Healthy Places to also help support community efforts to address barriers to health that are **related** to Neighborhood and Built Environment.

Four points of technical assistance to assist communities from **Planning** through **Implementation**.

Commerce

▶ PHASE 1 PLANNING

 Conducted Market Scan
Dialogued with over 2500 people
Launched a Communication Platform
FreshMob Activations in 8 locations
Piloted Pop-up Farmer's Market
Developed "My Dinner in Montbello" Concept
Branded Montbello Alive!

MONTBELLO FRESHLO INITIATIVE WHAT WE HEARD

The neighborhood lacks healthy food options and infrastructure that would allow general walkability.

- Very little community meeting or gathering space to support an active and engaging sense of community.
- Limited availability of fresh food options contributes to high rates of diabetes and obesity.
- Larger chain grocery stores regard neighborhood demographics as a barrier to entry into the market.

WHAT WE HEARD cont'd

- The neighborhood lacks connectivity to schools, transit, food shopping, or even for simple exercise.
- RTD has consolidated bus routes, resulting in less service within the neighborhood.

MONTBELLO FRESHLO INITIATIVE INITIATIVE ELEMENTS

<u>Goal 1. Build a cultural hub that will unify the diverse cultural perspectives of the community. Includes:</u>

- Medium-sized fresh food market.
- Fresh Food Farmacy
- Cultural Hub Performance and artist exhibition space.
- Small and large meeting/gathering places.
- Community kitchen as an incubator for micro-enterprise development.
- Affordable housing units.

INITIATIVE ELEMENTS

<u>Goal 2. Expand the existing Montbello Urban Farm as a</u> <u>means of increasing local production and distribution of</u> <u>fresh and healthy food.</u>

- Expanded in-ground growing space to increase the yield of fresh produce during the growing season.
- Build a commercial greenhouse to expand food production year-round.
- Implement a comprehensive food access system to improve health among low-income residents.

INITIATIVE ELEMENTS

<u>Goal 3. Create a walkable "healthy living loop" that</u> <u>connects community gardens, school gardens, other</u> <u>natural outdoor spaces, and the Cultural Hub.</u>

- Enhance activated school and community gardens and mini farms as points along the walkable loop.
- Work with Denver Public Works department to improve sidewalks and street crossings.
- Create signage and include art installations that reflect the culture of the community.

INITIATIVE ELEMENTS

Goal 4.

- Publish a bimonthly, bilingual newspaper the MUSE and distribute door-to-door and online.
- Sponsor annual MONTBELLO ALIVE! Feastival and 5K Run
- Provide interpretation at every community meeting hosted by MOC.
- Canvas the neighborhood bi-annually to ascertain community concerns.

MONTBELLO FRESHLO INITIATIVE What Will Be Better?

Healthier residents at all ages – decreased obesity, diabetes, high blood pressure, etc. All residents have access to fresh, locally-grown food. Better neighborhood connectivity to schools, transit, food shopping, or even for simple exercise.

Artists at all ages will have venues for their art right in the community.

New jobs right in the community.
