

# BENEFITS OF GETTING THE COVID-19 VACCINE

**COVID-19 vaccination will keep you from getting COVID-19!**

Experts believe that getting a COVID-19 vaccine may also help keep you from getting seriously ill even if you do get COVID-19.

Getting vaccinated yourself may also help to protect the people around you, particularly those at increased risk for severe illness from COVID-19.

**COVID-19 vaccination is a safer way to help build protection!**

Clinical trials of ALL vaccines must first show they are safe & effective before any vaccine can be authorized or approved for use, including all COVID-19 vaccines.

COVID-19 vaccination will help protect you by creating an antibody (immune system) response without having to experience sickness.

AND  
**WHERE TO  
GET ONE!**

**COVID-19 vaccination will be an important tool to help stop the pandemic!**

**REMINDER!**

Continue to wear a mask & social distance as it will help reduce your chance of being exposed to the virus or spreading it to others.

*Major pharmacies including Meijer's, CVS, Rite Aid, and Walgreens have all announced they will also be offering the COVID-19 vaccine to those who qualify to receive it as they become available. Many other healthcare providers, insurance carriers and non-profit organizations will also be offering appointments for vaccination. Residents are advised to check their direct websites frequently for further information.*
